

Directions:

Print, laminate and cut as many boards as you need for your students. Cut apart transportation cards and shuffle well. Place in the middle of the table or in an envelope. Use any stimulus cards (articulation or different types of language cards). Each student will complete the task in turn. After the student responds correctly, have the student draw a transportation card. The goal is to collect all 5 types of air transportation. If a student draws one that he already has, he must return the card to the bottom of the stack or envelope. Play continues until one or all of the students have collected the 5 cards.
